

IES COLLEGE OF ENGINEERING

(An Engineering College Promoted by the Ideal Educational Society)
Approved by AICTE, New Delhi & Affiliated to A.P.J. Abdul Kalam Technological University

06/08/2025

TO WHOMSOEVER IT MAY CONCERN

This is to certify that the details of the Capacity Development and Skill Enhancement activities-(5.1.3) are organized for improving students' capabilities-

1. Soft skills
2. Language and communication skills
3. Life skills (Yoga, physical fitness, health and hygiene)
4. Awareness of trends in technology

Organized for improving students' capabilities (5.1.3) offered by the institution during the year (2024-25) is as attached herewith.

REPORT ON AI FOR CIVIL ENGINEERS

Date: September 15th 2025

Venue: Civil Seminar Hall

1. Introduction

A technical session on "AI for Civil Engineers " was organized on September 15, 2025, specifically tailored for professionals and students in the field of Civil Engineering. The session was delivered by Mr. Nishant P, a subject matter expert with extensive knowledge in AI applications across engineering disciplines.

The talk aimed to introduce the fundamentals of Artificial Intelligence (AI) and explore their transformative applications in civil engineering, particularly in construction and infrastructure development.

2. Objectives

The primary objectives of the session were:

- To introduce the concepts and principles of AI and robotics.
- To demonstrate the relevance and applicability of emerging technologies in civil engineering.
- To explore future trends and potential career opportunities within this interdisciplinary field.

3. Session Highlights

The technical talk was structured into the following thematic areas:

- **Introduction to AI**
Overview of AI, including basic definitions, components, and distinctions.
- **Applications in Civil Engineering**
Real-world examples and case studies on the use of AI in:
 - Construction automation
 - Structural health monitoring
 - Project planning and management
 - Smart infrastructure
- **Future Prospects and Industry Trends**
Discussion on evolving technologies such as machine learning, computer vision, drone-based monitoring, and autonomous machinery, along with their expected impact on the industry.

4. Key Takeaways

- **Enhanced Efficiency and Precision:**
AI-driven tools and robotic systems can significantly improve project timelines, reduce human error, and increase accuracy in construction tasks.
- **Process Optimization:**
Technologies like predictive analytics and automated systems contribute to more streamlined workflows in infrastructure projects.
- **Opportunities for Civil Engineers:**
Integration of AI and robotics opens up new avenues for civil engineers, emphasizing the importance of interdisciplinary learning and adaptability to technological trends.

5. Participant Feedback

The session was well-received by attendees, who highlighted the following aspects:

- The speaker's **clarity and depth of knowledge** on the subject.
- The use of **real-world examples** that made complex concepts more relatable.
- The **interactive nature** of the session, which encouraged active participation and discussion.

Overall, the feedback reflected a strong appreciation for the relevance and timeliness of the topic in today's rapidly evolving engineering landscape.

6. Conclusion

The technical talk on "AI for Civil Engineers" successfully met its objectives by providing civil engineers with critical insights into how emerging technologies can be leveraged in their

field. It underscored the importance of embracing innovation to remain competitive and effective in modern engineering practices.

Such sessions play a vital role in bridging the gap between traditional engineering practices and future-ready technological solutions.

DEPARTMENT OF CIVIL ENGINEERING

Report- TOTAL STATION WORKSHOP

Department of Civil Engineering organized a Total Station workshop, led by Global Hi Tech Survey Team, on 29/09/2025 for S3 Civil Engineering students.

Session started at 9 am, by introducing the Total station instrument to the student. They divided the students into two groups of 11 students each. Initially they started with the calculation of horizontal and vertical distance measurement. Then they moved to area calculation and plotting the survey points.

Department of Civil Engineering

IES COLLEGE OF
ENGINEERING
CHITTILAPPILLY, THRISSUR- 680 551

DEPARTMENT OF CIVIL ENGINEERING

Students conducted the survey in the space between EEE and ME block and established some survey points. Then the results obtained from the Total Station is checked with the manually calculated values, and it was matching.

Overall, the program achieved its objectives of introducing the advanced surveying instrument to students and inspiring them to explore potential career paths in this vital domain. The workshop completed at 4.00pm.

Outcomes:

- Improved understanding of total station instrument
- Hands on experience with the functions of the instrument
- Practical application of the skill

REPORT ON TECHNICAL TALKS ON THE ASSOCIATION DAY OF CSE

Title : Technical talk on Block chain, Cryptography, Emerging Open Source LLM - Deepseek AI

Date : 28th January 2025

Time : 2:00 PM to 4:00 PM

Venue : IES Auditorium

The Department of Computer Science and Engineering, IES College of Engineering, successfully conducted three technical talks by students in S4, S6, S8 students on the association day of CSE(CESA) as the part of technical club Evotech on 28th January 2025. The programme aimed to enhance the technical skills and knowledge of students in CSE in the area of block chain, cryptography and emerging open source LLM - Deepseek AI.

The session commenced with a warm welcome by Michelle Aijo, S6 CSE, IES College of Engineering, who extended her greetings to all the dignitaries, technical talkers and audience. Her welcome address set the tone for a fruitful and interactive session.

The session was handled by Michelle Aijo, S6 CSE, S6 CSE, IES College of Engineering, on the topic cryptography. This session provides a comprehensive introduction to cryptography, the science of securing information. It begins with a look at classical cryptographic techniques and progresses to modern systems like AES and RSA. The talk explains the differences between symmetric and asymmetric encryption, the role of hash functions, and how cryptography ensures confidentiality, authentication, and data integrity. The goal is to help students understand not only how cryptography works but why it is essential in today's digital world.

The other session was handled by GR Adhish, S4 CSE, S6 CSE, IES College of Engineering, on the topic Block chain. This technical talk demystifies blockchain technology, starting from its origin in powering cryptocurrencies like Bitcoin, and expanding into its broader potential across industries. Audience learned the core concepts of decentralization, distributed ledgers, and consensus mechanisms. The session explores how blockchain ensures transparency, immutability, and security in digital transactions. Real-world use cases beyond finance such as supply chain management, healthcare, digital identity, and smart contracts demonstrate its

growing relevance. The talk aims to equip students with a clear understanding of how blockchain is transforming technology and opening new career paths.

The final session was handled by Panicker Adhithya Gopinath, S8 CSE, S6 CSE, IES College of Engineering, on the topic emerging open source LLM - Deepseek AI. This technical session explores the evolution and impact of open-source Large Language Models (LLMs), with a focus on Deepseek AI, one of the most promising emerging projects in the AI landscape. The talk begins with an overview of LLM fundamental architecture, training data, and inference pipelines before diving into how the open-source movement is democratizing access to AI. The students learned how Deep Seek, a powerful open-source model inspired by GPT architectures, is optimized for research, reasoning, and real-world tasks. The session will compare it with other open models like LLaMA, Mistral, and Falcon, and explain how merging or fine-tuning models can boost performance. Real-world applications, challenges in training/fine-tuning, and ethical considerations of open-source LLMs will also be covered. This talk is ideal for students and developers interested in AI research, model deployment, and the future of open innovation in machine learning.

The session concluded with a vote of thanks by Anitta Mariya Shajan, S6 CSE, S6 CSE, IES College of Engineering, expressing gratitude to the principal, HOD, participants and the staff members.

REPORT ON TECHNICAL TALK ON LaTeX

Title : Technical talk on LaTeX

Date : 04th February 2025

Time : 7:30 PM to 8:30 PM

Venue : Online session at Zoom app

The Department of Computer Science and Engineering, IES College of Engineering, successfully conducted technical talk on LaTeX as the part of technical club Evotech on 04th February 2025. The programme was conducted by S8 CSE students in IES College of Engineering. The programme aimed to enhance the technical skills and knowledge of students in CSE in LaTeX software to study how to make the documents for mini projects and main projects.

The session commenced with a warm welcome by Michelle Aljo, S6 CSE, IES College of Engineering, who extended her greetings to all the dignitaries, technical talkers and audience. Her welcome address set the tone for a fruitful and interactive session.

The session was handled by Nandana O R, Aysha Dilna and Fathima Dilsha, S8 CSE, IES College of Engineering, on the topic LaTeX. This session provides a comprehensive introduction to LaTeX. It discussed how to create scientific, technical, and academic documents, especially those involving complex mathematical equations. They concluded that unlike traditional word processors, LaTeX allows authors to focus on content while it handles the formatting, ensuring consistency and professional quality. It excels in managing references, bibliographies, tables, and figures, making it the preferred choice for research papers, theses, and publications. They also discussed an example using overleaf and discussed the commands and codes used to form documents in LaTeX.

The session concluded with a vote of thanks by Anitta Mariya Shajan, S6 CSE, IES College of Engineering, expressing gratitude to the HOD, participants and the staff members.

Title : Technical talk on Computer Architecture with RISC V

Date : 03rd April 2025

Time : 8:00 PM to 9:00 PM

Venue : Online session Meet App

The Department of Computer Science and Engineering, IES College of Engineering, successfully conducted a technical talk on **Computer Architecture with RISC V** as the part of technical club Evotech on 03rd April 2025. The programme aimed to enhance the technical skills and knowledge of S4 & S6 students in CSE in the area of Computer Architecture with RISC V.

The session commenced with a warm welcome by **Anitta Maria Shajan, S6 CSE, IES College of Engineering**, who extended her greetings to all the dignitaries, resource person and audience. Her welcome address set the tone for a fruitful and interactive session.

The session was handled by **Mr.Swapneel Chandrakant Mhatre** on the topic Computer Architecture with RISC V. This session provides a comprehensive introduction computer architecture with RISC V, what is RISC V, why is RISC V, RISC-V vs other architectures, architectural highlights, applications of RISC-V, challenges and limitations of RISC V and future in RISC V. He also discussed the sample assembly code. It is highly useful for the S4 students because they want to study the subject system software in the coming semester.

The session concluded with a vote of thanks by **Aneena Anto, S6 CSE, IES College of Engineering**, expressing gratitude to the principal, HOD, resource person, participants and the staff members.

REPORT ON ELECTRONIC PITCH EVENT

Event	Date & Time	Venue	Participants	Speaker	Outcome/ Benefit of the Programme
Idea presentation named ECE INNOVATION PITCH EVENT	1 January 28 th , 2025 9.00am-4.00pm	MC Lab	students of IESCE Department.	Mr. Ajeesh S, AP, ECE, Christ College of Engineering	<ul style="list-style-type: none"> The idea presentation focuses how to identify real-world challenges and design effective electronic or communication-based solutions.

An idea presentation named ECE INNOVATION PITCH EVENT was conducted on January 28th, 2025. This event was open to all circuit branches and it encouraged students to address a social or environmental issue through innovation in ECE. The event was organized by IETE students forum, IESCE in association with TECSA, ECE department association. The judging panel comprised of Mr. Ajeesh S, AP, ECE, Christ College of Engineering, Ms. Rachana M K, HoD, ECE, IESCE and Ms. Sindhu T V, AP, ECE, IESCE. The presentation started at 9.00 AM. There were 10 batches registered for the presentation, each with variety of ideas. The judging panel gave valuable comments and suggestions for improvement so that they can take their ideas to the next level. The event came to an end at 3.00 PM. The first prize was awarded to the team "Tech Tribe" who presented the idea of Blind "Assistance". The team members were Mohammed Irfan, Parthiv Prem, Reuban Raphy and Shuhaib Ashraf of S6 ECE and they received a cash prize of Rs. 1000 from the Principal. The second prize was achieved by the team "Brain-Bridge" who presented the idea of "Brain Computer Interface". Thoms Dixon from S8 ECE presented the idea

IMPACT ANALYSIS

Electronic pitch events provided students with a platform to showcase their innovative ideas, develop entrepreneurial skills, and connect with industry professionals. This encouraged students to apply concepts from engineering, business, and technology courses in real-world scenarios. It prepared students to confidently articulate ideas in front of an audience. It not only developed leadership, teamwork, time management, and critical thinking skills but also increased self-esteem and public speaking ability while pitching ideas in front of judges.

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

REPORT ON UNLOCK THE WORLD OF INTERNATIONAL CAREER OPPORTUNITIES

The seminar titled "Unlock the World of International Career Opportunities" was conducted by Microtec Thrissur on the 18th of November, 2024, at the BEE Seminar Hall, IES Engineering College, Thrissur. The session aimed to shed light on the various global career prospects available for students, especially those from engineering backgrounds. The seminar commenced with an introduction by the Principal of IES Engineering College, who welcomed the attendees and emphasized the importance of exploring international career opportunities in today's competitive global job market. The keynote speaker, Mr. Navaf P. K., delivered an insightful and engaging talk on how students can tap into the vast array of career opportunities available worldwide. His session was structured to guide students through the various pathways they can take to secure international positions. Mr. Navaf spoke about the increasing demand for skilled professionals in different sectors across the globe and discussed the qualifications, skills, and global networks that students need to build to unlock these opportunities. After the keynote address, Mr. Navaf opened the floor for a Q&A session. Students were eager to understand more about how to leverage their current skill sets and educational qualifications to land international roles. The seminar concluded with the HOD of the Department of Electrical and Electronics Engineering thanking the speaker, the college administration, and the students for their active participation.

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

REPORT OF WORKSHOP ON HANDS ON TRAINING IN AUTOCAD- ELECTRICAL

Department of Electrical and Electronics Engineering, IIS College of Engineering in association with EESA & IEEE conducted a technical workshop on hands on training in AUTOCAD-Electrical for faculties and students of S4, S6 and S8 at ERE Seminar Hall on 13th January 2025. The program started at 1:30 PM with a silent prayer followed by a welcome speech by Aan Joel student of S6 EEE. Felicitation by Dr John Chembukkavay, Head of the department followed by the workshop on hands on training in AUTOCAD by the resource persons.

The workshop aimed to provide hands on training in CADD software. Ms. Rajisha began the session by introducing participants to the fundamentals of electrical symbols used in the CADD software. In addition to the practical session, an online test was conducted. Certificates were awarded to participants. The session concluded with a feedback segment where students shared their opinions about the workshop.

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

REPORT OF ONE DAY ELECTRICAL VEHICLE WORKSHOP AND SOLAR POWER PLANT VISIT CONDUCTED ON 28/01/2025

Department of Electrical and Electronics Engineering, IES College of Engineering in association with EESA & IEEE conducted a one day electrical workshop on Electric vehicle and a visit to solar power for students of S4, S6 and S8 and for students from various colleges at EEE Seminar Hall on 28th January 2025. The program started at 9.30 AM with a silent prayer followed by a welcome speech by Athul Krishna V of S8 EEE, EESA President. Felicitation by Dr John Chembukkavu, Head of the department. **ELECTRIC VEHICLE** by Dr John Chembukkavu, (HOD/EEE).

Session 1: Introduction to Electric Vehicles

- **Speaker:** Dr John Chembukkavu (HOD/EEE)
- **Content:**
 - Overview of electric vehicles: What are EVs?
 - Types of EVs: BEVs, PHEVs, HEVs.
 - Basic components of an EV (battery, motor, charging system).
 - Differences between traditional internal combustion engine (ICE) vehicles and EVs.

Session 2: Technological Advancements in Electric Vehicles

- **Speaker:** RIZWAN of S8, EEE
- **Content:**
 - Battery technologies: Lithium-ion vs. solid-state batteries.
 - Charging infrastructure: Fast-charging vs. slow-charging stations.
 - Regenerative braking systems.
 - Autonomous driving and EV integration.

• Session 3: Environmental and Economic Impact

- **Speaker:** Dr John Chembukkavu (HOD/EEE).
- **Content:**
 - Environmental benefits: Reduction in carbon emissions.
 - Economic advantages: Savings on fuel, tax incentives, and subsidies.
 - Life-cycle analysis of EVs (manufacturing, operation, and disposal).

IES COLLEGE OF ENGINEERING

(Ac ISO 9001: 2008 Certified Institution)
Chittappally P.O., Thrissur, Kerala - 680 951, Ph: 0487-2209999, 2309967
Fax: 230 7027, E-Mail: mail@iesce.edu, www.iesce.edu
Approved by AICTE, New Delhi & Affiliated to APJ Abdul Kalam Technological University

• Session 4: The Future of Electric Vehicles

- **Speaker:** RIZWAN of S6, EEE

- **Content:**

- Global trends in the adoption of EVs.
- Challenges faced in EV adoption (charging infrastructure, battery disposal).
- Government policies and regulations supporting EV adoption.
- Innovations in EV design and technology.

• Session 5: Hands-On Demonstration and EV Test Drives

- **Content:**

- Participants had the opportunity to interact with different EV models.
- Test drive of available EVs, guided by industry experts.
- Explanation of vehicle performance, charging stations, and energy consumption.

The theory sessions concluded at 12.45 PM and practical sessions begin at 2.00PM. The participants were divided into 3 groups and each group were guided to witness and learn different EV technologies.

Key Highlights

- **Interactive Q&A Sessions:** Attendees had the chance to ask experts about specific EV-related concerns, such as range anxiety, battery longevity, and the future of EV manufacturing.
- **Networking Opportunities:** Participants from different sectors (engineering, automotive, environmental advocacy) were able to exchange ideas and form new collaborations.
- **Practical Demonstrations:** Attendees experienced the real-world application of EV technology, including test drives and charging demonstrations through EV punch and scooter.

Feedback and Evaluation

- **Participant Engagement:** Over 90% of attendees found the workshop to be informative and engaging.
- **Key Takeaways:**
 - A deeper understanding of the technical aspects of EVs.
 - Insights into the future of EVs in a rapidly evolving market.
 - Increased awareness of environmental sustainability through the adoption of electric vehicles.
- **Suggestions for Improvement:**
 - More hands-on sessions with different EV models.
 - Extended discussions on policy frameworks and financial incentives.

IES COLLEGE OF ENGINEERING

(An ISO 9001: 2000 Certified Institution)
Cherthala P.O., Thiruvananthapuram - 695 021, Ph: 0477-230088, 230087
Fax: 230 7077; E-Mail: enquiries@ies.ac.in, www.ies.ac.in
Approved by AICTE, New Delhi & Affiliated to APJ Abdul Kalam Technological University

Conclusion

The one-day Electric Vehicle Workshop was a success in terms of both knowledge dissemination and participant engagement. It provided a valuable platform for individuals to gain a deeper understanding of electric vehicles, learn about cutting-edge innovations in the field, and explore the role of EVs in shaping a sustainable future. The feedback from attendees has been overwhelmingly positive, with many requesting similar workshops in the future to delve deeper into specific topics such as EV maintenance, advanced battery technologies, and policy frameworks.

Recommendations for Future Workshops

1. Organize follow-up workshops focusing on the future of battery technology and EV maintenance.
2. Invite more industry leaders for deeper discussions on policy and regulatory aspects.
3. Explore opportunities for virtual workshops to reach a wider audience, especially in areas with limited access to EV infrastructure.

Date of Visit: 28/01/25.

Location: IES COLLEGE OF ARCHITECTURE

Time of Visit: 2.00 TO 4.00 PM

Visitor(s): POLYTECHNIQUE & IES COLLEGE STUDENTS

Purpose of Visit: To observe the operations, technology, and impact of the solar power plant.

Introduction:

The visit to the solar power plant aimed to provide firsthand knowledge about the production of solar energy, its technology, and its role in sustainable energy generation. The plant we visited uses solar panels to harness the sun's energy, convert it into electricity, and supply it to the grid.

Key Observations:

1. Overview of the Solar Plant:

- The solar power plant covers an area of 6.5 feet by 3.3 feet and is equipped with 400 number of solar panels.
- The facility is designed to generate 243 Kilo watt megawatts (MW) of power, enough to power approximately 80 to 90 homes or [insert percentage] of the local community.
- The plant utilizes Concentrated (CSP) such as monocrystalline or polycrystalline panels.

2. Technology and Equipment:

- Solar panels: The plant uses high-efficiency photovoltaic (PV) cells to capture sunlight and convert it into electricity.
- Inverters: These devices convert the direct current (DC) produced by the solar panels into alternating current (AC), which is suitable for grid distribution.

IES COLLEGE OF ENGINEERING

(An ISO 9001:2008 Certified Institution)

Chittagudi P.O., Thiruvananthapuram - 680 551, Ph: 0477-2330088, 2330067

Fax: 230 7077, E-Mail: mail@iesce.edu, iesce@iesce.edu

Approved by AICTE, New Delhi & Affiliated to APJ Abdul Kalam Technological University

- **Monitoring Systems:** Advanced software systems are in place to monitor real-time energy generation, performance, and equipment health.
- **Tracking systems:** Some of the panels are equipped with tracking systems that follow the sun's movement, increasing the efficiency of energy production.
- 3. **Operations and Functionality:**
 - The plant operates 24/7, though its efficiency varies depending on weather conditions and sunlight hours.
 - During daylight hours, solar panels produce electricity, which is fed into the local grid, providing a renewable source of energy for homes and businesses.
 - The energy production peaks at midday when sunlight is strongest.
- 4. **Environmental Impact:**
 - Solar power is a clean and renewable energy source that reduces the dependency on fossil fuels, minimizing harmful emissions such as carbon dioxide (CO₂).
- 5. **Maintenance and Workforce:**
 - A team of [insert number] technicians and engineers ensures the plant is operating at full capacity. The plant is regularly maintained to ensure that the solar panels and other equipment remain in good working condition.
- 6. **Challenges and Future Prospects:**
 - One of the main challenges the plant faces is the dependency on weather conditions; cloudy days or long periods of rain can reduce energy generation.
- 7. **Safety Protocols:**
 - The safety of employees and visitors is paramount. The plant has strict safety measures, including wearing protective gear such as helmets, gloves, and safety vests.

Conclusion:

The visit to the solar power plant was an enlightening experience. It provided insight into how renewable energy sources, particularly solar power, contribute to a sustainable energy future. The plant's advanced technology and environmentally conscious practices demonstrate the importance of shifting towards cleaner, renewable sources of energy. While challenges like weather dependency and energy storage remain, the progress in solar power production is promising, and its role in combating climate change is undeniable.

Recommendations:

1. **Increased Investment in Energy Storage:** Further research and investment in energy storage solutions could help overcome the intermittent nature of solar power.
2. **Community Awareness:** Educating the local community about the benefits of solar energy and its role in reducing carbon footprints could foster wider adoption.
3. **Future Technological Upgrades:** Continuous upgrades to solar panel technology, including more efficient cells and tracking systems, could increase the plant's energy output.

This visit demonstrated that solar power is a reliable and sustainable source of energy, contributing positively to both the local community and the global effort to mitigate climate change.

REPORT ON TECHNICAL TALK

Date: February 7, 2025

Speaker: Mr. Harikrishnan G.B.

Audience: Data Science Students

Introduction:

On February 7, 2025, a highly insightful technical talk titled "Scope of Data Science" was delivered by Mr. Harikrishnan, a seasoned expert in the field of Data Science. The talk, organized for Data Science students, aimed at exploring the diverse opportunities and emerging trends in the domain of Data Science. The session was interactive and highly informative, offering both theoretical knowledge and practical insights.

Key Highlights of the Talk:

1. Introduction to Data Science:

- Mr. Harikrishnan started by providing a brief overview of Data Science, emphasizing its role as an interdisciplinary field that combines mathematics, statistics, programming, and domain expertise to extract meaningful insights from data.
- He explained the fundamental concepts of Data Science, including data wrangling, data analysis, and machine learning, which form the core of data-driven decision-making.

2. The Growing Importance of Data Science:

- One of the central themes of the talk was the increasing importance of Data Science across industries. Mr. Harikrishnan highlighted how companies are increasingly relying on data to drive their strategies, optimize processes, and predict future trends.
- The speaker also discussed the rise of "data-driven culture" in business, healthcare, finance, and other sectors, with an emphasis on how Data Science is shaping organizational decision-making.

3. Career Opportunities in Data Science:

- Mr. Harikrishnan provided a comprehensive overview of the various career paths within Data Science. He discussed roles such as Data Analyst, Data Engineer, Data Scientist, Machine Learning Engineer, and Research Scientist.
- The speaker also emphasized the value of specialization within the field, such as natural language processing (NLP), deep learning, and computer vision, which are rapidly growing subfields in Data Science.

4. Emerging Trends and Technologies:

- A major section of the talk focused on the latest trends in Data Science. Mr. Harikrishnan discussed advancements in Artificial Intelligence (AI), Machine Learning (ML), and big data technologies, along with their real-world applications.

- He particularly pointed out the growing influence of AI-powered tools, automated machine learning (AutoML), and cloud platforms in transforming the landscape of Data Science.
- 6. **Challenges in Data Science:**
 - While emphasizing the scope of Data Science, Mr. Harikrishnan also addressed the challenges that professionals in this field face. He discussed the importance of handling messy data, ensuring data privacy and security, and dealing with ethical considerations related to data usage.
 - He stressed the need for Data Scientists to constantly update their skills to keep up with the fast-paced nature of technological advancements.
- 7. **Skills Required for a Career in Data Science:**
 - The talk included a detailed analysis of the technical and non-technical skills required to succeed in Data Science. Mr. Harikrishnan highlighted the importance of strong programming skills (in languages like Python and R), knowledge of machine learning algorithms, and proficiency in tools such as SQL and Tableau.
 - He also underlined the significance of soft skills, such as problem-solving abilities, communication skills, and the ability to work in cross-functional teams.
- 8. **Real-World Applications of Data Science:**
 - Throughout the talk, Mr. Harikrishnan illustrated the scope of Data Science with examples from real-world applications. He discussed the role of Data Science in areas like personalized recommendations (e.g., Netflix, Amazon), healthcare (predicting patient outcomes), and finance (fraud detection).
 - These examples helped students connect the theoretical aspects of Data Science with practical, industry-relevant scenarios.

Conclusion:

The talk by Mr. Harikrishnan on the "Scope of Data Science" was an eye-opener for the Data Science students. It provided a deep dive into the vast potential of Data Science as a career and its role in shaping the future of various industries. The speaker's insights into the skills, technologies, and challenges involved in Data Science gave students a clear understanding of what lies ahead in their professional journeys.

The session was well-received, with many students appreciating the speaker's ability to simplify complex concepts and provide actionable career advice. Overall, the event successfully encouraged students to explore the dynamic world of Data Science with enthusiasm and curiosity.

IMPACT ASSESSMENT

Workshop on "Virtual Robotics"

The Program "Virtual Robotics" was conducted for the of second year students of RAI, Department for improving their academic skills based on robots and its application.

The participants understood the basics of robotic, coding and sensor application in various engineering discipline. They learned how to use coding language to control a robot line follower and maze runner and their advantage using website like GEARSBOT.

This session will definitely help the students to create an industrial robot using code language. The participants acknowledged that the session was very good and they have understood how to code and applications. They suggested that they needed more sessions like this so that they can improve their technical knowledge in robotics field.

Coordinators

Principal

DEPARTMENT OF ROBOTICS & AI

IES COLLEGE OF ENGINEERING, CHITTILAPPILLY

Date and Time: September 12th, 2024

From 12:00 pm to 2:00 PM

The main objectives of orientation are

- Understanding the basics of robotics and its applications
- To explore the wide opportunities of robotics

The orientation program, conducted by Robo Home Learning, was designed to introduce participants to the rapidly evolving world of robotics and its potential impact on various industries. Led by two prominent figures in the organization, **Mr. Aravind**, the CEO, and **Mr. Adarsh**, an experienced trainer, the event provided valuable insights into how robotics is shaping the future and the skillsets necessary for students and professionals to thrive in this field.

Opening Remarks by Mr. Aravind (CEO):

Mr. Aravind, with his vast experience and forward-thinking approach, delivered the keynote speech. His talk revolved around the theme "**The Future of Robotics: Opportunities and Challenges.**" Some of the critical points he discussed include:

- **Current Trends in Robotics:** He started by discussing the current state of the robotics industry, emphasizing how it has moved beyond industrial automation to more advanced and adaptive systems. Fields such as healthcare, agriculture, manufacturing, and logistics are experiencing revolutionary changes due to robotics.
- **Artificial Intelligence (AI) and Robotics:** Mr. Aravind highlighted the growing intersection of AI and robotics. He explained how AI-driven robots can learn, adapt, and make autonomous decisions. For instance, robotic systems used in hospitals for precision surgery and agriculture robots improving crop yield were shared as case studies.
- **Opportunities in the Future:** The CEO laid out the roadmap for the next decade, forecasting significant growth in areas such as:
 - **Service Robots:** Personal robots, including home assistants, robotic caregivers, and entertainment robots.

- **Collaborative Robots (Cobots):** Robots designed to work alongside humans in industrial and service settings.
 - **Autonomous Vehicles:** Drones, self-driving cars, and underwater exploration robots.
- **Challenges Facing the Robotics Industry:** While the future of robotics is promising, Mr. Aravind didn't shy away from addressing the challenges, including:
 - **Ethical Concerns:** The need for developing ethical AI and robots, especially in autonomous decision-making.
 - **Workforce Adaptation:** Preparing the workforce for a future where robots replace repetitive jobs and how educational institutions should focus on robotics education.
- **Robo Home Learning's Vision:** He concluded his speech by sharing Robo Home Learning's vision to become a leader in robotics education, preparing the next generation of engineers, developers, and creators to push the boundaries of what robots can achieve.

Interactive Session by Mr. Adarsh (Trainer):

Following the keynote, **Mr. Adarsh**, a seasoned robotics trainer at Robo Home Learning, engaged the participants with an interactive session on the **"Skills and Technologies Driving the Future of Robotics"**.

- **Fundamental Skills for Aspiring Roboticists:** Mr. Adarsh emphasized that the future of robotics will be driven by a multidisciplinary approach. He broke down the essential skills required:
 - **Programming:** Knowledge of programming languages like Python, C++, and ROS (Robot Operating System) for developing and controlling robotic systems.
 - **Electronics and Embedded Systems:** Understanding microcontrollers, sensors, and actuators, which form the backbone of any robotic system.
 - **Mechanical Engineering:** Understanding kinematics, dynamics, and robot design principles.
 - **AI and Machine Learning:** Leveraging AI to improve robotic intelligence, including computer vision, neural networks, and reinforcement learning.
- **Hands-On Experience:** He provided insights into the importance of **hands-on training** through practical projects. Mr. Adarsh walked the participants through some of the key projects that Robo Home Learning offers to students:
 - **Autonomous Mobile Robots:** Designing robots that can navigate environments using

- **Robotic Arms and Manipulators:** Building and programming robotic arms used in industries for tasks like welding, packaging, or painting.
- **Drone Technology:** Learning to build and program drones for various applications like surveying and delivery.
- **Innovative Technologies:** Mr. Adarsh shared examples of cutting-edge technologies driving the future of robotics:
 - **3D Printing for Robotics:** How 3D printing is transforming the prototyping and manufacturing of robots.
 - **Swarm Robotics:** The concept of multiple robots working together like a colony of ants, useful in tasks like search and rescue.
 - **Humanoids and Social Robots:** Robots designed to interact with humans, particularly in service and healthcare settings.

Future Learning Opportunities at Robo Home Learning:

Mr. Adarsh concluded by discussing the different learning pathways offered by Robo Home Learning, including:

- **Beginner and Advanced Robotics Courses:** Covering everything from introductory programming to advanced robotics design.
- **Certification Programs:** In specialized fields like AI for Robotics, Industrial Automation, and Autonomous Vehicles.
- **Internship and Project-Based Learning:** Opportunities for hands-on industry experience with partner companies.

At the end of the orientation, a **Q&A session** was held where both Mr. Aravind and Mr. Adarsh answered participants' questions. Key discussion points included:

- The role of **robotics in education**, where students can leverage robots for creative problem-solving.
- **Career pathways in robotics**, such as robotics engineer, AI specialist, drone operator, and industrial automation technician.

The orientation program provided an in-depth look at the exciting possibilities that robotics holds for the future, while also equipping participants with knowledge on how to prepare themselves for a career in the ever-growing field. With the guidance of industry experts like Mr. Aravind and Mr. Adarsh, participants in the session inspired and informed, ready to explore the world of robotics.

Robo Home Learning reaffirmed its commitment to empowering individuals to become future leaders in the robotics industry, offering education that blends theory with hands-on practice.

IMPACT ANALYSIS

The impact analysis of the orientation program on the future of robotics by Robo Home Learning focuses on evaluating how effectively the program enhances participants' knowledge, interest, and readiness for the evolving robotics industry. The program aims to introduce students, professionals, and educators to cutting-edge robotics technologies and trends. Short-term impacts include measurable improvements in participants' understanding of robotics concepts, increased interest in pursuing related careers or further education, and shifts in perception regarding the accessibility and relevance of robotics in various industries. Long-term impacts would involve tracking participants' career choices, skill development, and practical application of robotics knowledge, as well as fostering collaborations in research or professional projects. Feedback on program structure, content quality, and instructor effectiveness also plays a key role in shaping future iterations of the program. Overall, the analysis highlights how the orientation prepares attendees for the future of robotics, ensuring both immediate learning outcomes and sustained engagement. The impact analysis of Robo Home Learning's orientation program on the future of robotics would give a comprehensive understanding of its success in increasing knowledge, sparking interest, and preparing participants for future developments in robotics. Through various metrics such as knowledge assessment, participant feedback, and long-term engagement, Robo Home Learning can measure the effectiveness and refine future programs for greater impact.

WORKSHOP REPORT

Title: Practical Insights into Embedded Systems

Date: 01st February 2025

Venue: MC Lab

Mode: Offline

Organizing Department: Robotics & AI Engineering

Event Coordinator: Ms. Nidhiya Tittas (Asst. Professor)

Resource Person: Mr. Shinat Joy, Academic Coordinator, ROBOHOME Learning

1. Introduction

The Department of Robotics & AI Engineering conducted a hands-on workshop titled "Practical Insights into Embedded Systems" on 01st February 2025. The objective was to introduce students to the fundamental concepts of embedded systems through practical sessions and coding exercises.

2. Objectives of the Workshop

- To understand the fundamentals of microcontrollers and embedded system design.
- To gain practical experience in using Keil uVision IDE and Arduino platforms.
- To interface sensors and peripherals using Embedded C.
- To implement UART communication and stepper motor control.

3. Workshop Highlights

- Introduction to microcontroller architecture and real-world applications.
- Demonstration and practical coding using Keil IDE and Arduino boards.
- Programming exercises focused on UART message display and stepper motor control.
- Interactive session with Q&A.

4. Participation

A total of 11 students from the 4th semester of the Robotics and AI Engineering department participated.

7. Photos

IMPACT ANALYSIS

Title: Practical Insights into Embedded Systems

Date: 01st February 2025

Organized by: Department of Robotics & AI Engineering, IES College of Engineering

Resource Person: Mr. Shinat Joy, Academic Coordinator, ROBOHOME Learning

1. Educational Impact

The workshop provided hands-on exposure to embedded system fundamentals for 4th semester students, significantly enriching their academic learning. By engaging with real hardware platforms like Arduino and using professional tools like Keil uVision IDE, students developed practical skills complementing their classroom knowledge.

2. Technical Skill Development

Participants gained:

- A deeper understanding of microcontroller architectures.
- Experience in writing Embedded C code.
- Practical knowledge of UART communication, sensor integration, and stepper motor control.

These experiences strengthened their ability to design and debug real-time embedded systems, which are critical for careers in robotics, IoT, and automation.

3. Industry Readiness

The focus on practical implementations and the inclusion of widely used development tools helped bridge the gap between theoretical knowledge and industry practices. This hands-on training supports the long-term goal of producing industry-ready graduates who can confidently contribute to technology-driven organizations.

4. Research Orientation

The workshop planted the seeds for interest in embedded system design, a crucial area in research and development. Some students expressed curiosity in exploring more advanced topics such as RTOS, communication protocols, and system optimization, which could evolve into mini-projects or capstone research work.

5. Institutional Impact

- Strengthened the department's capability to host skill-building sessions.

Report of the course THE ADVENT OF AI for B.Tech - Semester I-(Batch 2024)

Submission

1. BACKGROUND

Under the aegis of the Dept. of Science & Humanities, and Literary & Science Club, "The Advent of AI", an AI Training program was initiated. The resource person was Dr Nithin G, Technical Director, Kites Software, Kochi & Empanelled Trainer, AI& ML, ICT Academy, Keala. The program was implemented with an objective to build up Artificial intelligence goals of our first year students.

2. TRAINING OBJECTIVES

The objectives of the training were as follows:

- To make students understand the importance of logical deductions that simulate human reasoning.
- To familiarize the students about the idea of knowledge representation and knowledge engineering.
- To give an insight into making future predictions and determining the consequence of our actions.

3. PARTICIPANTS-All First year students of the Batch 2024 participated in the session.

4. SCHEDULE-The training program was conducted on 12/9/2024 in the FN session.

5. VENUE : The training was organized in the Auditorium.

6. DURATION-Teaching Session from 9.30 am to 12.30 pm

7. IMPACT ANALYSIS- Artificial intelligence, is a critical element today, and the session focused on giving an introduction to developing efficient algorithms.

8. FEEDBACK- The students stated that they understood the basic definitions and segregations of the technical terms like AI, ML, etc., and they also had an insight into the applications of machine learning, deep learning and applications of AI for data segregation.

Report of the Skill Development Session for B.Tech - Semester I (Batch 2024)

1. BACKGROUND

Under the aegis of the Dept. of Science & Humanities, a Skill Development Session was initiated. The session was conducted by corporate trainee & Industry Expert, Sudeesh G Nair. The program was implemented with an objective to improve, time management, problem-solving, and digital literacy for our first year students.

2. TRAINING OBJECTIVES

The objectives of the training were as follows:

- **Enhance Communication Skills:** Improve students' ability to express themselves clearly and listen actively.
- **Develop Time Management Techniques:** Equip students with strategies to manage their time efficiently.
- **Foster Problem-Solving and Critical Thinking:** Strengthen students' ability to approach and resolve problems.

3. PARTICIPANTS

All First year students of the Batch 2024 participated in the session.

4. SCHEDULE

The training program was conducted on 6/9/2024 in the FN session.

5. VENUE

The training was organized in the Auditorium.

6. DURATION

Teaching Session from 9.30 am to 12.30 pm

7. IMPACT/FEEDBACK

- **Skill Enhancement:** Students demonstrated measurable improvements across all targeted skill areas.
- **Increased Confidence:** Participants reported a boost in their confidence related to communication and problem-solving.
- **Practical Application:** Students appreciated the practical, hands-on approach of the class, which facilitated immediate application of skills. Prepared by ,

8. CHALLENGES –The program could be conducted smoothly and no major issues were faced.

Report of Heartfulness meditation Submission
for B.Tech - Semester I (Batch 2024)

1. BACKGROUND

Under the aegis of the Dept. of Science & Humanities, a meditation & chair yoga Training program was initiated. The Heartfulness Meditation was designed to help practitioners regulate and relax the mind and expand consciousness, eventually leading to a permanently awakened state, not only during meditation but at all other times, commenced from September 3, 2024 and was conducted by Sri K Mohanan, Sri CV Molly from the Heartfulness Meditation & Brighter Minds, Kerala.

2. TRAINING OBJECTIVES

The objectives of the training were as follows:

- To give a sense of calm, peace and balance that can benefit your emotional well-being and your overall health.
- To relax and cope with stress by focusing on something that calms you. Meditation can help you learn to stay centered and keep inner peace.
- To create internal peace through self-connection by meditating on the heart.

3. PARTICIPANTS

First year students of CE, CSE, DS, EC, EEE & ME departments (Batch 2024) participated in the sessions.

4. SCHEDULE

The team comprised of resource personnel - Sri K Mohanan, Sri CV Molly from the Heartfulness Meditation & Brighter Minds, Kerala

and delivered sessions with effect from 03/9/2024

SI NO	Date & Day	Time
1	3rd September , 2024(Tuesday)	Forenoon
2	4th September , 2024Wednesday	Forenoon
3	5th September , 2024Thursday	Forenoon

5. VENUE

The training was organized in the auditorium.

6. FEEDBACK- Most of the Students opined that though the sessions were beneficial, they felt that yoga is not a part of the youth world. However some students felt that this was a good way for self awareness.

7. IMPACT ANALYSIS-Meditation gave the students a significant understanding of a set of techniques to enhance attention, emotional awareness, kindness, compassion, sympathetic joy, and mental calmness even in difficult situations. Some people find that regular meditation practice helps them be kind to themselves and more caring towards others. However, maintaining the strength of that connection can only happen through a daily connection with the heart

8. CHALLENGES -The program could be conducted smoothly and no major issues were faced.

BACKGROUND-Under the aegis of the Dept. of Science & Humanities and Literary & Science club, a ZUMBA Session was initiated. The Trainer was Ms. Zin Sonia Johny International Licensed Instructor, Thrissur. The program was implemented for the first-year students to incorporate the importance of a healthy body and sound mind.

1. TRAINING OBJECTIVES-The objectives of the training were as follows:

- Personal growth development
- Improved flexibility and mobility
- Stress relief and relaxation
- Boost confidence and self-esteem, improve mental well-being and self image
- Improved coordination and balance.

2. PARTICIPANTS-All First-year students of the Batch 2024 participated in the session.

3. SCHEDULE-The training program was conducted on 05/09/2024 in the AN session.

4. VENUE -The training was organized in the Auditorium.

5. DURATION-Teaching Session from 3 pm TO 4.15 ppm

6. IMPACT ANALYSIS: The training focused more physical, mental and emotional support and healthy mind goals. It enhanced the understanding of the students regarding a balanced approach to maintaining health.

7. FEEDBACK-Students participated with great enthusiasm and they stated that they would like to have repeated sessions.

Submission
Report of the motivational talk for B.Tech - Semester I-(Batch 2024)

1. BACKGROUND

Under the aegis of the Dept. of Science & Humanities, a motivational talk was initiated. The talk was delivered by Mr. Rajesh (HR Mentor) Director CEST, on 11/9/2024 in the FN session. The program was implemented with an objective to understand the importance of self-awareness and self-discovery in achieving success and fulfillment for our first year students.

2. TRAINING OBJECTIVES

The objectives of the training were as follows:

- **Encourage Self-Reflection:** Emphasize the importance of understanding one's strengths, weaknesses, values, and interests.
- **Enhance Personal Growth:** Guide students on how self-awareness can lead to personal and professional growth.
- **Foster Goal Setting:** Help students align their goals with their true selves to achieve a more meaningful and successful career.

3. PARTICIPANTS

All First year students of the Batch 2024 participated in the session.

4. SCHEDULE

The training program was conducted on 11/9/2024 in the FN session.

5. VENUE

The training was organized in the Auditorium.

6. DURATION

Teaching Session from 10:00 am to 12:00 pm

7. FEEDBACK

Relevance: Students found the content highly relevant to their current stage in life. The speaker's insights into self-discovery and goal setting were well-received.

Engagement: The interactive elements of the talk were particularly appreciated. Students felt that the activities and discussions helped them engage more deeply with the material. Many indicated that they would continue to use the tools and strategies discussed in the talk.

8. IMPACT

By identifying the strengths and understanding the weaknesses of students, they will develop greater self-confidence. This confidence is likely to translate into improved performance in both academic and personal areas. Students can undertake continuous self-reflection for personal development.

9. CHALLENGES - The program could be conducted smoothly and no major issues were faced.

An Orientation on Industry-Focused CAD was conducted on 19th February 2025 at IES College of Engineering. The session aimed to familiarize students with CAD applications used in modern industries and enhance their technical readiness for competitive examinations and industry assessments. The resource person, Mr. Anandhu G., introduced advanced CAD concepts, real-world design practices, and software workflows commonly used in manufacturing, automotive, and engineering sectors. A total of 50 students participated and gained valuable exposure to industry-relevant CAD techniques. The event helped students improve their technical competency and better prepare for technical tests and competitive exam patterns.

IDEA PITCHING COMPETITION 2025

March 22, 2025

The IDEA Pitching Competition 2025, organized by the Innovation and Entrepreneurship Development Centre (IEDC) of IES College of Engineering, was successfully conducted on March 22, 2025, at the IEDC Room. The event aimed to encourage first- and second-year students to present their innovative ideas and entrepreneurial solutions.

The competition saw enthusiastic participation from multiple teams, each consisting of 2-4 members. The students presented their ideas to a panel of esteemed judges, including Ms. Shahaziya Parvez, Ms. Rachana M. K, and Ms. Bench Varghese. The judging criteria focused on innovation, feasibility, impact, and presentation skills.

Throughout the event, students showcased unique ideas, ranging from technological advancements to sustainable business solutions. The judges provided valuable feedback and guidance to help participants refine their concepts further. The event also emphasized the importance of creativity and problem-solving in entrepreneurship.

The competition was coordinated by Rudra and Michele Aijo, who ensured the smooth execution of the event. The last date for idea submission was March 20, 2025, giving teams ample time to prepare their pitches. The session started at 1:30 PM and witnessed engaging discussions between participants and judges.

This event proved to be an excellent platform for young minds to step into the entrepreneurial world, fostering a spirit of innovation and collaboration. The IEDC of IES College of Engineering continues to support aspiring entrepreneurs by organizing such initiatives, paving the way for future startups and business leaders.

IEDC WEB DEVELOPMENT WORKSHOP

On 6th March 2025, the Innovation and Entrepreneurship Development Centre (IEDC) of IES College of Engineering, Chittilappilly, organized a Web Development Workshop for all ExeCom members at the R&AI Lab.

The workshop was led by expert resource persons, Nijo Nelson and Michelle Aijo, who guided the participants through the fundamentals of web development. The program was coordinated by Mrs. Shahziya, IEDC Nodal Officer, HOD, R&AI Department, IESCE.

The workshop, structured from 9:00 am to 3:25 pm, began with an introductory session by the nodal officer. The program focused on introducing participants to web development technologies, including HTML, CSS, JavaScript, and popular frameworks.

Participants had hands-on experience designing and developing their own web applications under the guidance of the resource persons. They learned about database integration, user authentication, and deployment. The workshop also introduced participants to popular web development tools and software.

The Web Development Workshop aimed to familiarize students with fundamental web development technologies, their applications, and hands-on experience in designing and developing web applications. The dedication and enthusiasm exhibited by the resource persons contributed to the resounding success of this program.

The participants expressed great appreciation and satisfaction about the event in the concluding session. Online feedback was collected from all participants, and e-certificates of participation were issued.

The entire session was effective, and the students and staff were technically elevated.

REPORT OF IPR SESSION

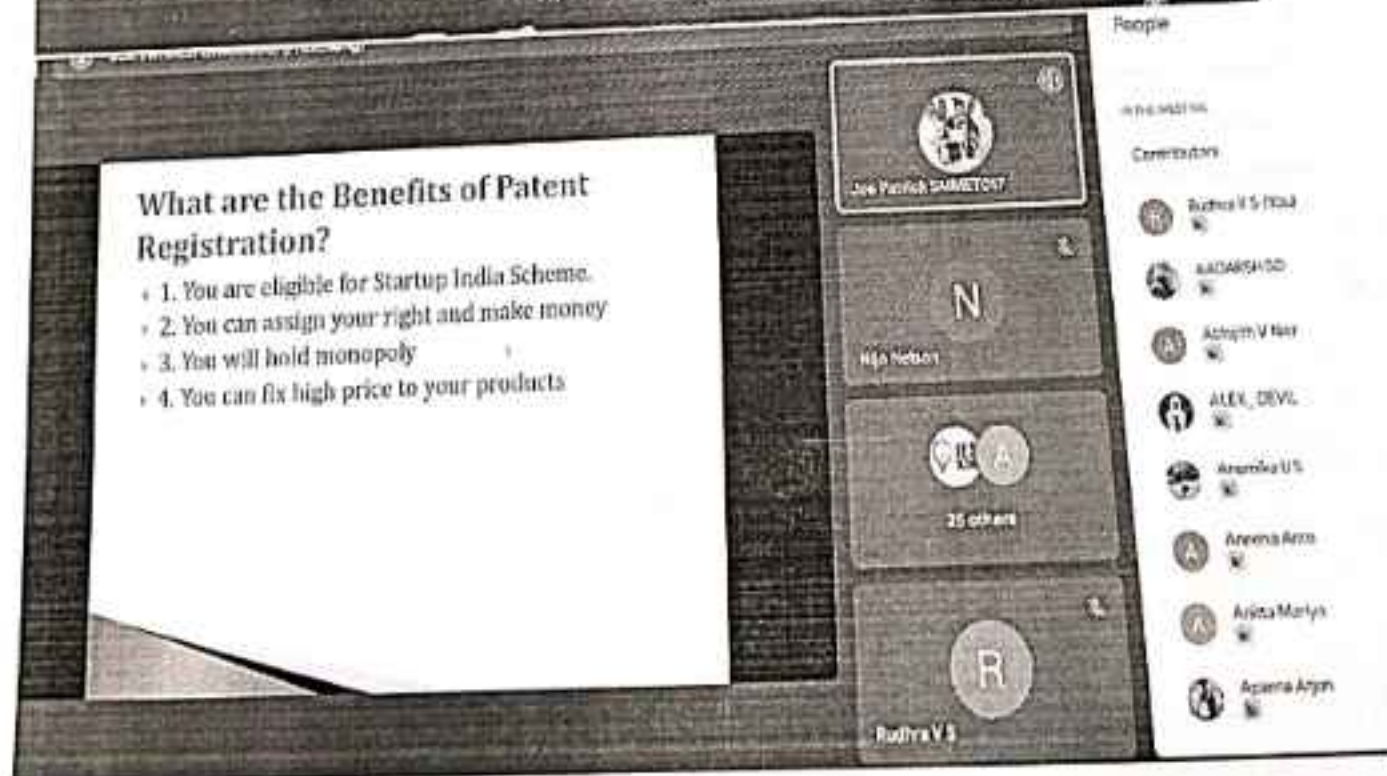

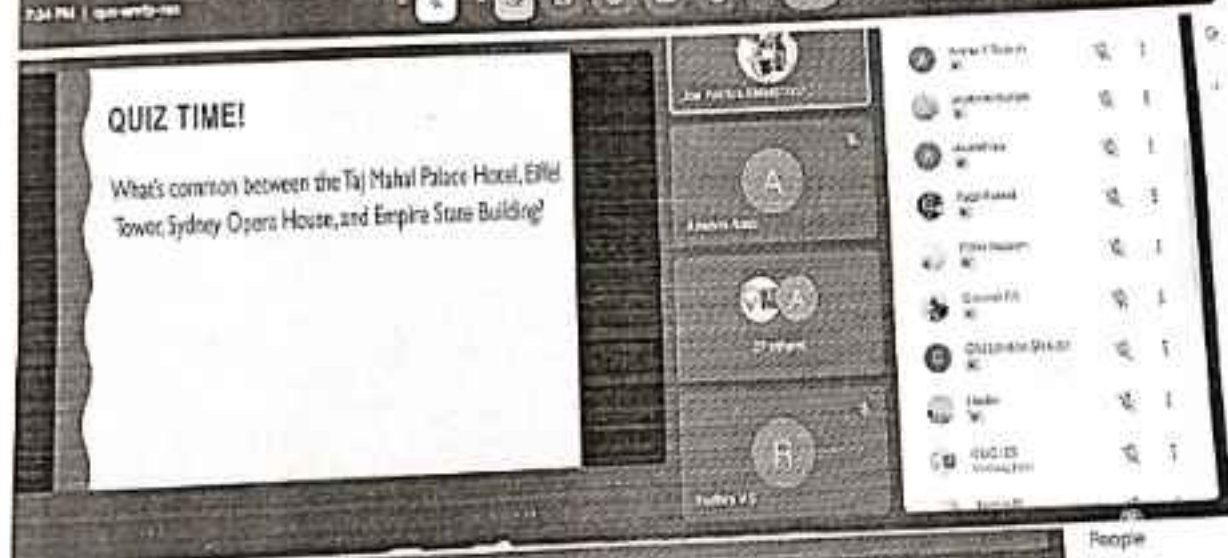

25th February 2025 :- The IPR (Intellectual Property Rights) Session was organized by IES College of Engineering in association with IES IEDC on 25th February 2025. The session aimed to empower students and professionals with knowledge about intellectual property rights and their significance in the modern era.

The session was led by Dr. S Joe Patrick Ganaraj, Professor and Head, Principal Investigator, Department of Mechanical Engineering. Dr. Ganaraj shared his extensive knowledge and experience in the field of intellectual property, emphasizing its importance for innovation, research, and business growth.

Some of the highlights of the session are Dr. Ganaraj explained the concept of intellectual property and its different types, including patents, trademarks, copyrights, and trade secrets. He highlighted the role of intellectual property in fostering innovation and protecting the rights of inventors and creators. The session covered the challenges faced in securing and maintaining intellectual property rights and suggested best practices to overcome them. The session concluded with an interactive Q&A where participants had the opportunity to clarify their doubts and seek guidance from the speaker.

The session witnessed active participation from students, faculty, and professionals. The attendees expressed positive feedback about the clarity and depth of the speaker's insights.

The IPR Session was a highly informative and engaging event. It successfully enhanced participants' understanding of intellectual property rights and encouraged them to consider the legal and strategic aspects of innovation. The event concluded with a vote of thanks to Dr. S Joe Patrick Ganaraj for his valuable contribution.

IEDC LINKEDIN WORKSHOP

On January 18, 2025, the Innovation and Entrepreneurship Development Centre (IEDC) of IES College of Engineering, Chittillapally, organized a LinkedIn workshop for all executive committee (execom) members. Unlike previous years, this workshop was led by Dilsha Moideen, CEO of the IEDC cell and a student of S8 CSE, with coordination from Mrs. Shahziya, IEDC Nodal Officer and HOD of the R&AI Department at IESCE. The workshop, held from 10.00 AM to 11:00 PM, began with an introduction by the nodal officer, focusing on LinkedIn profile creation and platform orientation under Dilsha Moideen's guidance.

The Introduction to LinkedIn workshop aimed to equip students with skills for optimizing their profiles, fostering professional networking, and supporting career growth. The event saw enthusiastic participation from students across various disciplines. Dilsha Moideen's dedication contributed significantly to the program's success, providing students with a comprehensive understanding of LinkedIn and its benefits.

In the concluding session, participants expressed great appreciation and satisfaction. Online feedback was collected from all attendees, and e-certificates of participation were issued. Overall, the session was effective in enhancing technical knowledge among students and staff, fostering a positive learning environment.

KICK OFF'S

IEDC ORIENTATION PROGRAM FOR FIRST YEARS

By IEDC Nodal Officers & IEDC Leads

DATE

29th & 30th October 2024

TIME

12:45 PM to 4:15 PM

VENUE

EEE SEMINAR HALL

IEDC ORIENTATION PROGRAM REPORT

On October 29th and 30th 2024, IES IEDC organized an event aimed at providing information and introducing IEDC in our college to enthusiastic first year students from all branches. The program will take place from 12:45 PM to 4:15 PM in the EEE Seminar Hall. The event is organized by IEDC Nodal Officers and IEDC Leads

The session commenced in two day by divided into three sessions and each session for each branch and Mrs. Shahaziya Parvez M (nodal officer) start the session with brief introduction about IEDC and Dilsha, the CEO of IES IEDC welcomed the students. She also effectively addressed the students and introduced them to what IEDC is all about.

The session covered key concepts of IEDC's functioning and how this platform can be used for obtaining opportunities and building profiles. Beyond the introduction, she also engaged the students in various activities, including an ice-breaking session. These activities encompassed a brainstorming session, where students analyzed situations or problems to come up with optimal solutions. They were instructed to experiment, understand their daily lives, and formulate problem statements. Subsequently, discussions on ideas took place, involving artistic works and creativity. Dilsha also introduced the nodal officers: Mrs. Shahaziya Parvez M and Mrs. Prabhavathy P, along with the new executive members 2024-25, to the students.

The session concluded at 4:30 PM, with Dilsha, the CEO of IES IEDC, extending a vote of thanks to the participants and individuals who contributed to the event's success.

LINKEDIN WORKSHOP

A LinkedIn workshop was held on 18th November 2024 from 10:00 AM to 4:00 PM at Room 323, R&AI, IES specifically for the IEDC Execom members. The session was hosted by the IES IEDC of IES College of Engineering. The workshop aimed to equip participants with strategies to use LinkedIn effectively for professional development and growth.

The workshop was conducted by Afshad K A, an Embedded System Engineer, who guided attendees through optimizing their LinkedIn profiles and leveraging the platform's tools to build strong personal brands. Key topics included creating an impactful LinkedIn profile, highlighting skills and experiences, expanding networks, and engaging with industry professionals. Participants were also introduced to powerful networking strategies to expand their professional connections and increase their visibility in the industry.

The event was designed to be both informative and interactive, with participants engaging in practical exercises to apply the techniques discussed. The workshop concluded with a Q&A session where attendees could seek personalized advice on improving their LinkedIn presence. Overall, the workshop successfully provided the IEDC Execom members with the tools and insights needed to enhance their online professional image and unlock new opportunities.

The session concluded with a vote of thanks delivered by IEDC Nodal Officer, Ms. Shahzhiya Parvez, expressing gratitude to the speaker and participants for their active involvement.

IEDC DIMENSIONAL CRAFT LAB 3D PRINTING WORKSHOP

On 16th October 2024 the Dimensional Craft Lab in association with the Innovation and Entrepreneurship Development Centre (IEDC) of IES College of Engineering's Chittillapally organised a 3D printing workshop for all excom members at R&AI Lab. Unlike previous year workshop this workshop was led by the members of the Dimensional Craft Lab the resource person were Abhijith N and Abilash P (CEO of Dimensional Craft Lab, S4 CSE). The Program was coordinated by Mrs Shahziya Parvez M (IEDC Nodal officer, HOD, R&AI dep, IESCE). Along with the members of Dimensional Craft Lab. The workshop was structured from 9.00am-4.15pm. The program was started with small introduction by nodal officer. The program mainly focuses on 3D printing and the introduction to the printing machine. Also students had the opportunity to apply their newly acquired skill by designing their own 3D model under the guidance of faculties. Their prepared models for printing, including adjusting settings such as layer height, infill density and support structure. The Introduction to 3D printing workshop is aimed to familiarize students with fundamental 3D printing technology, its applications and hands-on experience. Students in designing and printing 3D model, students were introduced to popular 3D modelling software such as Tinkercad Fusion 360. They learned basic modelling techniques including creating 3D models and preparing models for printing etc... The dedication and enthusiasm exhibited by the resource person contributed to the resounding success of this program. It provided all students with a comprehensive understanding of 3D printing and their benefits. The participants expressed great appreciation and satisfaction about the event in the concluding session. The online Feedback has been collected from all the participants and E certificates of Participation has been issued. The entire session was effective and the students and staffs were technically elevated.

ORIENTATION ABOUT THE FUTURE OF ROBOTICS AND AI

RESOURCE PERSON

MR. ARVIND (CEO)

MR. ARVIND (Trainer)

12 SEP 2024

IES COLLEGE OF ENGINEERING, CHITTILAPPILLY
DEPARTMENT OF ROBOTICS & AI

A REPORT ON ORIENTATION ON THE FUTURE OF ROBOTICS AND AI

DATE : 12/09/24

B. Tech 3rd semester RAI

DEPARTMENT OF ROBOTICS & AI ENGINEERING

DEPARTMENT OF ROBOTICS & AI IES COLLEGE OF ENGINEERING, CHITILAPPILLY

Date and Time: September 12th, 2024

From 12:00 pmt to 2:00 PM

The main objectives of orientation are

- Understanding the basics of robotics and its applications
- To explore the wide opportunities of robotics

The orientation program, conducted by Robo Home Learning, was designed to introduce participants to the rapidly evolving world of robotics and its potential impact on various industries. Led by two prominent figures in the organization, Mr. Aravind, the CEO, and Mr. Adarsh, an experienced trainer, the event provided valuable insights into how robotics is shaping the future and the skillsets necessary for students and professionals to thrive in this field.

Opening Remarks by Mr. Aravind (CEO):

Mr. Aravind, with his vast experience and forward-thinking approach, delivered the keynote speech. His talk revolved around the theme **"The Future of Robotics: Opportunities and Challenges."** Some of the critical points he discussed include:

- **Current Trends in Robotics:** He started by discussing the current state of the robotics industry, emphasizing how it has moved beyond industrial automation to more advanced and adaptive systems. Fields such as healthcare, agriculture, manufacturing, and logistics are experiencing revolutionary changes due to robotics.
- **Artificial Intelligence (AI) and Robotics:** Mr. Aravind highlighted the growing intersection of AI and robotics. He explained how AI-driven robots can learn, adapt, and make autonomous decisions. For instance, robotic systems used in hospitals for precision surgery and agriculture robots improving crop yield were shared as case studies.
- **Opportunities in the Future:** The CEO laid out the roadmap for the next decade, forecasting significant growth in areas such as:
 - **Service Robots:** Personal robots, including home assistants, robotic caregivers, and entertainment robots.

- **Collaborative Robots (Cobots):** Robots designed to work alongside humans in industrial and service settings.
- **Autonomous Vehicles:** Drones, self-driving cars, and underwater exploration robots.
- **Challenges Facing the Robotics Industry:** While the future of robotics is promising, Mr. Aravind didn't shy away from addressing the challenges, including:
 - **Ethical Concerns:** The need for developing ethical AI and robots, especially in autonomous decision-making.
 - **Workforce Adaptation:** Preparing the workforce for a future where robots replace repetitive jobs and how educational institutions should focus on robotics education.
- **Robo Home Learning's Vision:** He concluded his speech by sharing Robo Home Learning's vision to become a leader in robotics education, preparing the next generation of engineers, developers, and creators to push the boundaries of what robots can achieve.

Interactive Session by Mr. Adarsh (Trainer):

Following the keynote, Mr. Adarsh, a seasoned robotics trainer at Robo Home Learning, engaged the participants with an interactive session on the "Skills and Technologies Driving the Future of Robotics."

- **Fundamental Skills for Aspiring Roboticians:** Mr. Adarsh emphasized that the future of robotics will be driven by a multidisciplinary approach. He broke down the essential skills required:
 - **Programming:** Knowledge of programming languages like Python, C++, and ROS (Robot Operating System) for developing and controlling robotic systems.
 - **Electronics and Embedded Systems:** Understanding microcontrollers, sensors, and actuators, which form the backbone of any robotic system.
 - **Mechanical Engineering:** Understanding kinematics, dynamics, and robot design principles.
 - **AI and Machine Learning:** Leveraging AI to improve robotic intelligence, including computer vision, neural networks, and reinforcement learning.
- **Hands-On Experience:** He provided insights into the importance of hands-on training through practical projects. Mr. Adarsh walked the participants through some of the key projects that Robo Home Learning offers to students:
 - **Autonomous Mobile Robots:** Designing robots that can navigate environments using sensors.

- **Robotic Arms and Manipulators:** Building and programming robotic arms used in industries for tasks like welding, packaging, or painting.
- **Drone Technology:** Learning to build and program drones for various applications like surveying and delivery.
- **Innovative Technologies:** Mr. Adarsh shared examples of cutting-edge technologies driving the future of robotics:
 - **3D Printing for Robotics:** How 3D printing is transforming the prototyping and manufacturing of robots.
 - **Swarm Robotics:** The concept of multiple robots working together like a colony of ants, useful in tasks like search and rescue.
 - **Humanoids and Social Robots:** Robots designed to interact with humans, particularly in service and healthcare settings.

Future Learning Opportunities at Robo Home Learning:

Mr. Adarsh concluded by discussing the different learning pathways offered by Robo Home Learning, including:

- **Beginner and Advanced Robotics Courses:** Covering everything from introductory programming to advanced robotics design.
- **Certification Programs:** In specialized fields like AI for Robotics, Industrial Automation, and Autonomous Vehicles.
- **Internship and Project-Based Learning:** Opportunities for hands-on industry experience with partner companies.

At the end of the orientation, a Q&A session was held where both Mr. Aravind and Mr. Adarsh answered participants' questions. Key discussion points included:

- **The role of robotics in education,** where students can leverage robots for creative problem-solving.
- **Career pathways in robotics,** such as robotics engineer, AI specialist, drone operator, and industrial automation technician.

Date	19-06-2024	Duration	4 hrs	No of volunteers Participated:
Title of Program	Reading Day Program			
Highlights of program	In connection with Reading Day celebrations, NSS Unit No. 186 of IES College of Engineering organized a Book Distribution Program at V.V. School, Chittilappilly to promote the joy of reading and support young learners. The initiative aimed to cultivate reading habits among students and emphasize the value of books in shaping knowledge and imagination. As part of the program, volunteers distributed storybooks, academic books, and notebooks to students, encouraging them to read more and make learning a joyful experience. The interaction with students also included short talks on the importance of reading in daily life. This thoughtful initiative reflected the NSS commitment to education, literacy, and community engagement, in line with the spirit of Reading Day.

Title of Program	DIGI KERALA SURVEY			
Highlights of program	<p>NSS Unit 186 of IES College of Engineering partnered with Adat Grama Panchayath to carry out the Digi Kerala Survey, a statewide initiative designed to map digital access and literacy at the household level. Over the course of the drive, our volunteers received orientation on survey protocols and data-collection tools, then conducted door-to-door visits throughout the panchayath's wards, recording information on smartphone and computer ownership, internet connectivity, use of e-governance portals, and awareness of digital-finance services. In addition to gathering data, the team demonstrated basic online government services—such as applying for certificates and paying utility bills—to residents who lacked digital familiarity, ensuring the survey doubled as a micro-training session. The collaboration not only provided the government with reliable ground-level insights for future digital-inclusion programs but also strengthened the college's community engagement and gave volunteers practical experience in field research, communication, and civic service.</p>

TRAINING AND PLACEMENT CELL

JULY - OCTOBER 2024

Month	DETAILS	DETAILS OF ACTIVITIES (WORKSHOPS)
JULY	AICTE APNA JOB CAREER PORTAL	Workshop -27/7/2024
JULY	FLIPKART GRID 6.0	Internship-36 students completed 1st level
JULY	MOCK PLACEMENT TEST for final years -batch 2025	29/7/2024
AUG	SOTI NEXTGEN campus recruitment	hiring (not selected)
AUG	LINKEDIN WORKSHOP	PLANNED
AUG	ASAP ASPIRE 2024	1 Registered
AUG	PLACEMENT TRAINING- out sourced	EC&CS -30 students 9th & 16th August, 2024
AUG	NXT Wave	gen AI workshop conducted on 10th August , 2024
AUG	Software trainee (Zuika)	Kevin manjila - student cs S7-lected
AUG	INTERNSHIPS Mechindex	Alay krishna , Mirnal ML, Thomas Dixon (ec S7 students)
AUG	INTERNSHIPS Technologies Global	Gopika , Sania , CS 7
AUG	PLACEMENT TRAINING & MERN STACK EY CSR	PLANNED
AUG	CADD International BIM	CE 7 students attended
SEPT	TCS registration	NOT registrations started
SEPT	SHREDS	13 CSE students ATTEMPTED 26/9/2024
SEPT	HR Training and Mock Interview-	28/9/2024 By Dr Senathipathi & Team
OCT	Reliance Industries Limited (RIL) (Graduate engineering training program)	four ME7 students registered
OCT	ASAP (govt of kerala)-Globalo employability test	Oct 6th
OCT	TCS Codevita	Code Viti registrations almost 200 students registered
OCT	Kerala Knowledge Economy Mission program	9/10/2024- final years participated
OCT	S5 database completion	completed
OCT	Resume preparation and Collection Status of S5 students	completed
OCT	Focus areas for Aptitude tests	ongoing with final years
OCT	Initiative for internships/ placements in Kerala companies	Ongoing
OCT	Mock interviews for final years	Continuing....
OCT	Placement summit	Asst TPO & CSE Hod attended on 19th October
OCT	Delta X	Online placement process on 8th November
OCT	Delta X training - Inhouse	Training on 24th , 25th October and 2nd November
OCT	NXT Wave (employability test)	26th Oct & 27th Oct
OCT	CADD International BIM EXPO	25th Oct- attended by 11 faculty from placement, CE, EEE & ME
OCT	Resume preparation	2022 , 2023, 2024 batch covered
NOV	Delta X Conducted exam	2024 batch attended
NOV	PAICK YOUT TRAIL	process initiated
NOV	Sutherland	process initiated
NOV	Bootlabs	process initiated exam (waiting for result)
NOV	Indus motors	process initiated (2024 mech students)

TRAINING AND PLACEMENT CELL

FEB- APRIL 2025

Month	Initiated by	DETAILS	REMARKS
FEBRUARY	DEPT - CIVIL	WINFRA CONDUCTED INTERVIEW	6 Students were Shortlisted
	IESCE	ELECTRIFEX @ INFOPARK	26 Students attended interview on 18th Feb but none selected
	IESCE	INFOSYS	3 Students attended interview @raja gini college on 18th feb
	IESCE	PENTAGON SPACE	Online interview @ IESCE On 17th feb
	IESCE	EY GDS Next gen internship	6 week internship program for s6 EC&CS students by EDUNET
	IESCE	SUTHERLAND	Interview held on 19th feb , 25 students were selected
MARCH	IESCE	DWMS Training	Final years(Ongoing)
	TPO - Dr.Senathipathi	TCS Training& mock interview/CODING Test	TCSmock interview for S8 studentsand coding test CS EC EEE MECH s6 students
	IESCE	TALROP on campus drive	Interview held on 6th march, 2 students were selected
	IESCE	NQT Test	conducted on 15th march
	EDUNET	Project Submission Training (On - Campus)	Special request training for CS & EC Pre-final years
APRIL	IESCE	career Path (Online)	
	IESCE	AIMRI

Subject: Appreciation letter for implementing the Next Gen Employability program in IES College of Engineering by Edunet Foundation in collaboration with EY GDS.

Dear Sir/Ma'am,

I am writing to express my appreciation to Edunet Foundation for implementing training under the Next Gen Employability Program for the academic year 2024 – 2025. The program helped the institution and students in bridging the gap between industry and higher education by introducing Industry 4.0 skills through an experiential and hands-on training program. The program focused on the MERN Stack and employability skills, which helped the students to prepare them for the world of work.

Overall, 113 number of students enrolled for the training program and 103 students completed the training program.

Once again, I would like to express my gratitude to Edunet Foundation and EY GDS for your support.

Regards
